No. 1, 2

Issue contents	1
Announcement from the Publisher	2
K. McLain, C. Schreiner, K.L. Yager, J.L. Stock and S.S. Potter Ectopic expression of <i>Hox-2.3</i> induces craniofacial and skeletal malformations in transgenic mice	3
B.A. Butler, J. Soong and J.P. Gergen The <i>Drosophila</i> segmentation gene <i>runt</i> has an extended <i>cis</i> -regulatory region that is required for vital expression at other stages of development	17
M. Asano and P. Gruss <i>Pax-5</i> is expressed at the midbrain-hindbrain boundary during mouse development	29
I. Karavanova, S. Vainio and I. Thesleff Transient and recurrent expression of the <i>Egr-1</i> gene in epithelial and mesenchymal cells during tooth morphogenesis suggests involvement in tissue interactions and in determination of cell fate	41
A. Fjose, P.R. Njølstad, S. Nornes, A. Molven and S. Krauss Structure and early embryonic expression of the zebrafish engrailed-2 gene	51
I. Van Wijk, J. Burfeind and T. Pieler Nuclear transport and phosphorylation of the RNA binding <i>Xenopus</i> zinc finger protein XFG 5-1	63
B. Christen and M. Bienz A <i>cis</i> -element mediating <i>Ultrabithorax</i> autoregulation in the central nervous system	73
C.R. Sharpe Two isoforms of retinoic acid receptor α expressed during <i>Xenopus</i> development respond to retinoic acid	81
R. Korn, M. Schoor, H. Neuhaus, U. Henseling, R. Soininen, J. Zachgo and A. Gossler Enhancer trap integrations in mouse embryonic stem cells give rise to staining patterns in chimaeric embryos with a high frequency and detect endogenous genes	95
R. Soininen, M. Schoor, U. Henseling, C. Tepe, B. Kisters-Woike, J. Rossant and A. Gossler The mouse <i>Enhancer trap locus 1</i> (<i>Etl-1</i>): a novel mammalian gene related to <i>Drosophila</i> and yeast transcriptional regulator genes	111

Letter to the editor

T. Hashimoto, Y. Nakano, T. Morinaga and T. Tamaoki A new family of homeobox genes encoding multiple homeodomain and zinc finger motifs	125
---	-----

No. 3

Issue contents	127
K. Chowdhury, M. Goulding, C. Walther, K. Imai and H. Fickenscher The ubiquitous transactivator Zfp-38 is upregulated during spermatogenesis with differential transcription	129
B.A. Reddy, M. Kloc and L.D. Etkin The cloning and characterization of a localized maternal transcript in <i>Xenopus laevis</i> whose zygotic counterpart is detected in the CNS	143
P.C. Salinas and R. Nusse Regional expression of the <i>Wnt-3</i> gene in the developing mouse forebrain in relationship to diencephalic neuromeres	151
S. Kondo A mechanistic model for morphogenesis and regeneration of limbs and imaginal discs	161
B.G. Jegalian, R.W. Miller, C.V.E. Wright, M. Blum and E.M. De Robertis A <i>Hox 3.3-lacZ</i> transgene expressed in developing limbs	171
S.L. Palmieri, J. Payne, C.D. Stiles, J.D. Biggers and M. Mercola Expression of mouse PDGF-A and PDGF α -receptor genes during pre- and post-implantation development: Evidence for a developmental shift from an autocrine to a paracrine mode of action	181
